Material Recycled

Company relay race

We experienced a very high volume of rubbish that was created at the relay race. It comes as a surprise that a ton of rubbish is created on such a day.

Glass 426 kg

Cans 91 kg

Plastic bottles 62 kg

Plastic sachets 177 kg

Boxes 56 kg

Total 812 kg

Non recyclable material that was taken to the rubbish dump was 250kg.

Once again we would like to thank Sportsvendo for making a difference and taking responsibility to recycle and support this initiative.

Thank you

Philip van Niekerk
