Material Recycled

McCarthy Volkswagen race

The McCarthy Volkswagen race was a great success not only in the actual event but also the initiative to recycle.

After the race all rubbish were separated and then taken for recycling at Remade Recyclers.

The following quantities were collected for recycling.

Glass	50 kg
Cans	10 kg
Plastic bottles	14 kg
Plastic sachets	150 kg
<u>Boxes</u>	<u>15 kg</u>
Total	239 kg

Non recyclable material that was taken to the rubbish dump was only 50kg.

We would like to thank Sportvendo and McCarthy Volkswagen in making a difference and supporting this initiative.

Thank you

Philip van Niekerk
